

ASCEND Life RPG - Developer & Maintenance Handbook (v2)

Updated with release/versioning and PWA cache procedures.

Release Versioning

Use release-style commits: v1 - Initial release v2 - Dashboard improvements v3 - Save backup system v4 - Achievement overhaul

PWA Cache Management

The PWA may continue serving old files after deployment. To force users onto a new version, increment the cache name in sw.js. Example: ascend-v1 -> ascend-v2 -> ascend-v3 -> ascend-v4

Standard Release Procedure

1. Make code changes. 2. Increment CACHE version in sw.js. 3. git add . 4. git commit -m "vX - Description" 5. git push 6. Wait for GitHub Pages deployment.

Save System

Export Save creates a JSON backup. Import Save restores progress. Always export before major updates.
